

**The Truth Behind**

**PLANNED  
PARENTHOOD**

# WHY SHOULD YOU READ THIS?

## Because ignorance is not bliss.

*Human Life Alliance Staff*

Beyond the rhetoric of supporters, do you know if Planned Parenthood really helps women?

Think about it. Planned Parenthood is the number one provider of abortions in the nation. Complications from abortion present real medical dangers to women. Dangers that include a higher risk of maternal death, which increase with each abortion;<sup>1</sup> links to mental illness,<sup>2</sup> sterility<sup>3</sup> as well as future risk of premature birth and low birth-weight<sup>4</sup> for the baby. Does any of this sound like a healthy choice?

Planned Parenthood claims to promote positive options for women, but it pushes birth control pills. The World Health Organization states these pills contain a Group 1 carcinogen.<sup>5</sup> Cancer is the second highest cause of death in American women.<sup>6</sup> Still think Planned Parenthood cares about women's health?

How about young people? Planned Parenthood champions the use of condoms by preteens and teens for “safer sex.” Condoms don't prevent herpes or human papillomavirus (HPV). Did you know more females die of complications related to HPV than AIDS?

Inside you can read information about Planned Parenthood's origins. You'll see evidence of its real purpose, how it obtains funds, and who it targets. You also learn about its deceptive marketing and fraudulent business practices. Today Planned Parenthood continues to embrace its questionable past and touts itself as, “America's most trusted provider of reproductive healthcare.”

Consider the alarming facts and real-life testimonies as you read about *The Truth Behind Planned Parenthood*. Your life—or the life of a woman you know—may depend on it.

# WHAT DOES PLANNED PARENTHOOD DO? (and NOT do?)

*Jim Sedlak, American Life League*

Planned Parenthood (PP) describes itself as, “America’s most trusted provider of reproductive health care.”<sup>1</sup> It says its health centers provide a wide range of safe, reliable health care — and claims the majority is preventive care, which helps prevent unintended pregnancies through contraception, reduces the spread of sexually transmitted infections through testing and treatment, and screens for cervical and other cancers. PP claims caring physicians, nurse practitioners, and other staff take time to talk with clients, encouraging them to ask questions in an environment that millions have grown to trust.<sup>2</sup>

definition that defines pregnancy as beginning at implantation in the womb.<sup>5</sup> Therefore, most of the products PP sells as contraceptives work, at least some of the time, by killing a new human being, rather than preventing her creation.

Planned Parenthood brags about how it reduces the spread of STIs.<sup>6</sup> Scientists have known for over 20 years that the birth control pill (and similar products) actually increase the spread of STIs through lowering the woman’s immune system and changing the acidity level of the cervical mucus. If PP was serious about reducing STIs, it would get its customers off the pill.

## Planned Parenthood does not like to talk about its abortion business, but it runs the nation’s largest abortion chain and commits over 300,000 abortions a year.

### *What does Planned Parenthood really do?*

Well, very few of its 597 clinics actually provide primary care. PP claims that of its 2.4 million customers, only 39,000 in 2015 — just 1.6 percent — get family practice services (primary care).<sup>3</sup>

Planned Parenthood talks about its “caring physicians,” yet, unless a woman is getting an abortion, most never see a physician. Typically, she would see a clinician or nurse. In most states, prescriptions for medication are written in the name of the local PP’s medical director — who the woman never sees.

Planned Parenthood does not like to talk about its abortion business, but it runs the nation’s largest abortion chain and commits over 300,000 abortions a year.<sup>4</sup>

**Planned Parenthood kills twice as many innocent human beings every week as died in the terrorist attacks on 9/11/2001.**

Planned Parenthood says its services prevent unintended pregnancies: however, it does not tell women what that means. Most women rightly believe that pregnancy begins when the sperm penetrates the egg and a new human being is created. PP however, uses an obscure 1965 medical

### *What does Planned Parenthood NOT do?*

Planned Parenthood’s supporters claim the organization does mammograms to detect breast cancer.<sup>7</sup> In fact, not one PP facility in the country was licensed to do mammograms in October 2017 or earlier.

Planned Parenthood claims to screen for cervical cancer. The major risk factor for cervical cancer is HPV (human papilloma virus). Women who start having sex at a young age and have many sex partners are more likely to get and stay infected with HPV.<sup>8</sup> Since PP encourages young people to explore their sexuality, it is the cause of the problem — not the solution.

Planned Parenthood is NOT a health organization. It is in the sex business and makes its money from young people who it lures into sexual lifestyles — with all the trauma and diseases that lifestyle brings.

# PLANNED PARENTHOOD

# EXPOSED

*Terrisa Bukovinac, Secular Pro-Life*

In 2015 The Center for Medical Progress (CMP), led by David Daleiden, released explosive undercover videos featuring top Planned Parenthood executives candidly discussing the procurement and sale of fetal tissue. Since then, these videos have sparked a massive Planned Parenthood counter campaign, multiple lawsuits against Daleiden and his associate Sandra Merritt, the demise of a major procurement corporation and a full scale investigation by the US Department of Justice (DOJ) into Planned Parenthood's baby body parts business.

## **Organs for Sale**

On July 15th, 2015, CMP released its first video featuring Planned Parenthood Federation of America's Senior Medical Director, Dr. Deborah Nucatola. Nucatola discussed various ways to alter late-term abortion procedures in order to obtain more valuable tissue for sale (a federal crime). People from across the political spectrum were horrified and shocked by the callous way Nucatola spoke about the demand for fetal livers, lungs and hearts, all while enjoying a salad and red wine.

## **The Counter Narrative**

Prior to the release, Daleiden spent two years working undercover posing as Robert Sarkis, an employee of Biomax—a tissue procurement company. This alias allowed Daleiden to go deep within the abortion industry to collect data including the video featuring Dr. Nucatola. CMP released a dozen additional videos depicting similar conversations with other top-level Planned Parenthood medical staff looking to contribute to the fiscal growth of their clinics. Planned Parenthood needed a counter narrative, and needed to act fast. It promptly poured an alleged \$8 million into a PR campaign that gave rise to the hashtag #StandWithPP as well as talking points like “deceptively edited” and “anti-choice extremists” which dominated every major media outlet.

## **A “Just” Justice**

Soon after the initial release, Planned Parenthood, Stem Express (a tissue procurement company) and the National Abortion Federation filed a series of lawsuits against the CMP team. Although Stem Express eventually dropped its lawsuit and walked away empty handed, PPFA and the NAF were able to secure a preliminary injunction which prevented CMP from releasing the hours of additional footage to the public or to law enforcement. The presiding judge in this case, Judge William Orrick III, has an ongoing relationship with Planned Parenthood Northern California, one of the plaintiffs suing Daleiden.<sup>1</sup> According to CMP, there are at least a dozen additional videos yet to be released. On December 13, 2017 attorneys representing CMP filed a writ of mandamus at the Ninth Circuit Court of Appeals in hopes of removing Orrick and replacing him with an unbiased judge. It's unclear why San Francisco's courts have not already removed Orrick from the case.

## **To the Courts**

In December 2017 the DOJ announced its investigation into Planned Parenthood's role in the sale and trafficking of human fetal organs.<sup>2</sup> As recently as December 8, Orange County District Attorney Tony Rackauckas reached a plea deal with DV Biologics LLC and sister company DaVinci Biosciences LLC—a biotech procurement company that worked directly with Planned Parenthood—in which the company will pay \$7.8 million in damages,<sup>3</sup> admit guilt in trafficking fetal tissue and abandon all business in California. According to the lawsuit, the company spent years selling tissue for up to \$1,100 per vial<sup>4</sup> in at least ten different countries. CMP expects an honest investigation of Planned Parenthood Northern California will reveal similar crimes.

**People from across the political spectrum were horrified and shocked by the callous way Nucatola spoke about the demand for fetal livers, lungs and hearts, all while enjoying a salad and red wine.**

### *Eavesdropping in Public*

Daleiden and Merritt continue to face 15 felony charges filed by California State Attorney General, Xavier Becerra, who has taken tens of thousands of dollars in campaign contributions from Planned Parenthood. Becerra is charging the duo, not with defamation, but with eavesdropping and one count of conspiracy to eavesdrop. This ignores the fact that these conversations took place in public spaces.

### *Pivotal Times*

These are pivotal times. Daleiden and Merritt's work could not only defund Planned Parenthood, but see it prosecuted for these crimes. Once Planned Parenthood's pervasive message is eliminated from media outlets and the offices of elected officials, an honest conversation can be had about the relationship between abortion and profit in America. This truth exposed could very likely signal the end to legal abortion in the United States, and the beginning of a culture that respects the inherent dignity and worth of every human, born and preborn.

*Terrisa is a co-leader of Secular Pro-Life.*

# FRAUD, DECEPTION & DEATH

## Oh my.

*Cheryl Sullenger, Operation Rescue*

While Planned Parenthood boasts that abortion procedures at their facilities are safe, evidence exists to indicate that is far from the truth.

There is no way to know how many complications from abortion actually occur at Planned Parenthood clinics because there are few mandatory reporting requirements for abortion

providers, who are known to often skirt the laws or under-report.

The truth about illegal and dangerous operations has been discovered through research and eye-witness accounts and gleaned through court documents and newspaper accounts. These known abortion abuses at Planned Parenthood are just the tip of a very large iceberg.

### THIS INCLUDES THE FOLLOWING...

 Patient deaths: Tonya Reaves<sup>1</sup> died July 20, 2012, from a hemorrhage caused by a perforation of her uterus during a second trimester abortion at a Planned Parenthood clinic in Chicago, Illinois. Cree Erwin<sup>2</sup> died July 3, 2016, due to an untreated perforated uterus from a botched first trimester abortion at Planned Parenthood in Kalamazoo, Michigan.

 Over 100 documented medical emergencies at Planned Parenthood abortion centers across the nation from January 2015 to November 2017.<sup>3</sup> For each known incident, many more go unreported and unnoticed.

 In 2015, the release of secretly recorded videos by the Center for Medical Progress showed that Planned Parenthood engaged in numerous violations of state and federal laws. Alleged violations included illegally selling aborted baby remains for profit, altering procedures to preserve fetal organs for resale and HIPAA privacy violations.<sup>4</sup>

 On December 2016, U.S. Senate Judiciary Committee<sup>5</sup> and the House Special Investigative Panel on Infant Lives<sup>6</sup> referred Planned Parenthood to the Department of Justice after

their investigations found probable cause to believe Planned Parenthood's trafficking in aborted baby remains broke the law.

 External audits show Planned Parenthood affiliates cost American taxpayers over \$130 million in waste, abuse and potentially fraudulent overbilling and penalties.<sup>7</sup>

 Closure of the entire Planned Parenthood Golden Gate<sup>8</sup> affiliate for financial malfeasance.

 Abortion sales quotas<sup>9</sup> that, when met, were rewarded with pizza parties.

 The widespread non-reporting of child sex abuse.<sup>10</sup>

 The participation in sex-selection abortions.<sup>11</sup>

 The experimental webcam abortion scam in Iowa resulted in banning the dangerous practice in at least nineteen states.<sup>12</sup>

 The documentation that Planned Parenthood specifically targets minority communities<sup>13</sup>, especially Blacks, for abortion.

**Planned Parenthood has also been caught promoting a number of deceptive statements. It insists abortions comprise only 3% of its services, but abortion actually accounts for 30% of its income.**

Planned Parenthood claims to be a “relentless” provider of cancer screenings, however between 2006-2013, it cut breast cancer screenings in half. Planned Parenthood claims if it is defunded of federal tax revenue, abortions will increase. However, when Texas defunded Planned Parenthood in 2012, abortions decreased in that state by 6.5% the following year.<sup>14</sup>

Through the Freedom of Information Act, some organizations (including Operation Rescue) are compiling documentation of the numerous health code violations that take place at Planned Parenthood abortion centers. Common violations

include failure to observe infection control protocols such as hand washing<sup>15</sup>, failure to properly sterilize surgical instruments, expired drugs, dirty facility conditions, lack of emergency plans and equipment and untrained staff.<sup>16</sup> All these create an unsafe environment for women.

It is clear Planned Parenthood presents a danger to the public that at times rises to the level of a criminal enterprise.

# RACIAL TARGETING & POPULATION CONTROL

Funded by you.

*Walter Hoye, Issues4Life Foundation*

There is an organization whose mission is population control.<sup>1</sup>

That organization was founded by Margaret Sanger<sup>2</sup>, a well-documented proponent of eugenics,<sup>3</sup> a celebrated Ku Klux Klan speaker<sup>4</sup> and one of the architects of the now infamous 1939 Negro Project,<sup>5</sup> whose sole objective was to infiltrate the Black community by hiring Black preachers<sup>6</sup> and present birth control as a health option for Black women.<sup>7</sup>

According to a Life Dynamics report entitled, "Racial Targeting and Population Control," which cross-examined zip codes of minority neighborhoods and abortion facilities across America, that organization has installed 83% of their abortion or abortion-referring facilities in minority neighborhoods.<sup>8</sup>

According to the research conducted by Protecting Black Life (an outreach of Life Issues Institute) and based on the 2010 United States Census, the twenty-third and most recent United States national census, that organization has 79% of its surgical abortion facilities located within walking distance of Black American and or Hispanic/Latino communities.<sup>9</sup>

That organization today is the largest abortion provider in the United States of America,<sup>10,11</sup> performing more than 324,000 abortions a year, 27,000 abortions a month, 6,230 abortions a week, over 887 abortions a day or about 2,592,000 abortions during former Democrat President Barack Obama's two terms in the White House.<sup>12</sup> To sum up the 2,592,000 abortions during former Democrat President Barack Obama's eight years in office in excruciating precision, that organization kills one child every ninety-seven seconds or if you're reading this article slowly, needing say, six minutes and forty-seven seconds, to leisurely (without haste and unhurried) finish reading this article, Planned Parenthood will have taken the lives of four babies and counting.

According to that organization's 2015-2016 annual report, \$554.6 million dollars of its \$1.354 billion dollars in total income, came from the United States government. In other words 40% of that organization's budget came out of the taxpayer's pocket.<sup>13</sup> With that money, that organization (which is a non-profit organization) made more than \$77 million dollars in profit, which is an increase of \$19 million more than the year prior.<sup>14</sup>

Further still, that organization's political arms spent over \$38 million dollars in funding

Democrat elections between 2012-2016.<sup>15</sup> And all while their Cancer screening have dropped by half (since 2011) and their prenatal services have dropped by almost half since 2016. All of which accounts for the fact that, that organization's abortions numbers now even outnumber basic breast exams for the first time in its history.<sup>16</sup> Historically, that organization is the same organization whose criminal negligence and depraved indifference botched Chicago's Tanya Reaves second trimester abortion and let the sister bleed for over five hours before calling emergency services.<sup>17</sup>

That organization is the same organization that's been caught advising sex-traffickers on how to secure abortions for underage girls with no questions asked.<sup>18</sup>

That organization is the same organization where donors can give money specifically for the abortion of a Black baby.<sup>19</sup>

That organization is the same organization whose president publicly claimed her organization provides mammograms, the breast cancer screening procedure for women, but whose staff in twenty-seven different states publicly stated: "We don't provide those services whatsoever."<sup>20</sup>

That organization is the same organization currently embroiled in a lawsuit that alleges its involvement in "repeated false, fraudulent, and ineligible claims for Medicaid reimbursements" through the Texas Women's Health Program.<sup>21</sup>

To top it all off, the Justice Department has now (2017) launched a federal investigation into that organization's practices and its sale of baby body parts caught on video tape by David Daleiden and Sandra Merriitt of the Center for Medical Progress.<sup>22</sup>

What is the name of this organization that uses over half a billion taxpayer dollars to target Black neighborhoods, perform and botch late-term abortions, advise sex traffickers and pimps<sup>23</sup> on how to secure taxpayer funded abortions for underage girls and falsely claims to provide lifesaving breast cancer screening while selling baby body parts?

Why, it's Planned Parenthood, but you already knew that, didn't you?

# PLANNED PARENTHOOD MEGA-CENTERS

## Designed to Deceive Public, Hinder Pro-Lifers.

*Eric Scheidler, Pro-Life Action League*

A decade ago, Planned Parenthood began an aggressive expansion strategy centered around the construction of large, new abortion facilities across the United States, starting with Aurora, Illinois. Thirty of these “mega-centers” are now open from Oregon to Florida, with more under construction or in the planning stages.

Pro-life activists speculate that the mega-centers program was launched in anticipation of new health care laws friendly to Planned Parenthood’s mission of promoting abortion, contraception and their skewed vision of sexual health. Indeed, the Affordable Care Act of 2010 (Obamacare) has proven to be a great boon to Planned Parenthood. Should future legislation expand taxpayer funding for abortion, the mega-centers will be there to capitalize on it even further.

The mega-centers also serve Planned Parenthood’s effort to create a more positive public image—to become “the Lenscrafters of reproductive health care” as one Planned Parenthood official put it. The small, run-down Planned Parenthood clinics in blighted neighborhoods so familiar to pro-life activists over the years are being replaced with these new “state of the art” facilities, often in upscale areas.

However, Planned Parenthood’s designs have often been undermined by the strategy of deception they have adopted in constructing the new mega-centers. They’ve created front-companies to buy property and acquire building permits, and have even gone so far as to lie to both contractors and local officials about the intended use of these buildings.

The public outcry resulting when this deception finally comes to light has aided pro-life resistance to the mega-centers, in some cases leading to fraud investigations and civil lawsuits. Though pro-lifers have only rarely stopped a mega-center from opening, several have been significantly delayed, and many new activists have been recruited thanks to the controversy.

The mega-centers are imposing structures, typically featuring bullet-proof glass, narrow windows and banks of video cameras—“abortion fortresses” of sorts. Planned Parenthood claims these features are needed for security, but their real purpose is two-fold: to appeal to major donors and to intimidate pro-life activists.

Planned Parenthood officials admit the mega-centers are designed to scuttle pro-life activity, especially sidewalk counseling, with entrances set back from the public sidewalk and dense landscaping making it hard for sidewalk counselors to speak to their clients.

Pro-life activists have risen to this formidable challenge by increasing their numbers outside the mega-centers, creatively using signage to reach clients and aggressively defending their rights in court. Thanks to these tireless efforts, unborn babies—and their mothers—are still being saved at the Planned Parenthood mega-centers.

*Eric Scheidler is the Executive Director of the Pro-Life Action League.*

**PRO-LIFE  
ACTION  
LEAGUE**

# PLANNED PARENTHOOD: CHAMPION OF “CHOICE” Really?

*Debra Braun, Pro-Life Action Ministries*

I have sidewalk counseled outside Planned Parenthood (PP) in St. Paul, MN since 1986, and have witnessed firsthand the tactics used by this “pro-choice” organization to limit women’s access to information and choices.

In the early years, we distributed pro-life literature at the driveway of PP’s Ford Parkway location and talked with clients as they walked past us into the abortion facility. The women could hear our offers of help. Many took literature and some gratefully accepted our help, choosing life for their babies! Then PP started using “escorts.” While these escorts walked the clients into the center, they talked to them, trying to prevent them from hearing the truth and offers of help.

We had another opportunity to talk to the women who were smokers. They would stand outside the door, giving us an additional chance to reach them with the truth, and this resulted in more lives saved. Eventually PP began directing smokers to the parking lot near a noisy air conditioning unit, hindering their ability to hear us.

Planned Parenthood’s guards often asked the women for our brochures and there was a trash can right inside labeled “Pop cans and protesters’ brochures.” And just recently, a woman who decided not to abort told us that she had secretly opened and read our brochure inside her bag while in the PP waiting room. She remembered that an acquaintance had been told by PP staff to put the brochure away or she would have to leave.

Planned Parenthood seeks to hide the truth from women. A woman once told us that PP employees had refused to give her a copy of her ultrasound photo until the woman was “forceful” in asking for it. (PP only does ultrasounds for abortions, to determine what abortion technique to use and how much to charge, based on the baby’s age.) This woman decided against abortion, as do many women after viewing their baby via ultrasound.

Planned Parenthood claims they offer information about choices women have, such as adoption. But once a PP employee brought a woman out to me to get adoption resources, information they apparently didn’t have.

When announcing plans for its new mega-center in St. Paul which opened in 2011, PP touted the fact that the building was designed to protect “privacy.” In other words, it was designed to further limit contact between the sidewalk counselors and the abortion clients.

When women call PP to make an appointment for an abortion, they are strongly encouraged to avoid the sidewalk counselors, whom PP calls “protestors.” Most of the women arrive by car. Once past the sidewalk counselors at the driveway, most park in the ramp behind the PP building and enter through the back door, largely out of sight and earshot of the counselor. However, they could see and hear the sidewalk counselors at the side of the complex so PP attached a covering to the fence there, again trying to prevent the women from receiving the truth about abortion.

Many of the escorts for PP interfere with private conversations between the sidewalk counselors and the women, even physically placing themselves in the middle of these conversations at the driveway or on the public sidewalk.

Over the years, PP has obtained court orders and called the police countless times, attempting to obstruct our First Amendment rights to freedom of speech and assembly. Despite all these efforts of PP to maintain a steady flow of “customers” for its abortion business, babies are still being saved through sidewalk counseling. The Truth is more powerful than Planned Parenthood.

*Debra Braun is the Education Director for Pro-Life Action Ministries*

**PRO-LIFE ACTION MINISTRIES**

# THE MASTER PLAN

## Too many of the “wrong kind” of people?

Ann Olson, *Human Life Alliance*

### **Planned Parenthood isn't just about abortion.**

It's about population control and eugenics, and it always has been.

Margaret Sanger, founder of the American Birth Control League, now Planned Parenthood, focused on the poor, immigrants, disabled and other minority groups. These remain the primary target clientele for Planned Parenthood today. She believed there were too many of the wrong kind of people: “human weeds,” “reckless breeders,” “human beings who never should have been born.”<sup>1</sup> She also said “The only real wealth of our country lies in the men and women of the next generation. A farmer would rather produce a thousand thoroughbreds than a million runts.”<sup>2</sup>

Abortion is just one of the many ways to achieve the goal of reducing the population.

Abby Johnson, a former Planned Parenthood director, writes:

**“When I worked at Planned Parenthood, there was something that we were not allowed to talk about. If we didn't talk about it, then maybe no one else would either. It was called the Jaffe Memo.”**

In 1969, then Vice President of Planned Parenthood, Frederick Jaffe, sent a memo to the head of the Population Council, Bernard Berelson. It included a table of “Proposed Measures to Reduce U.S. Fertility.” The Jaffe/Berelson Memo was drawn up by Jaffe as a companion piece to Berelson's paper, “*Beyond Family Planning*” published in the Population Council's February 1969 issue of *Studies in Family Planning*.

This shocking memo makes suggestions for policy changes to be implemented in order to achieve population control:

- Restructure family
- Postpone or avoid marriage
- Alter image of ideal family size
- Compulsory education of children
- Encourage increased homosexuality
- Educate for family limitation
- Fertility control agents in water supply
- Encourage women to work and provide few child care facilities

- Compulsory abortion of out-of-wedlock pregnancies
- Compulsory sterilization of all who have two children except for a few who would be allowed three
- Confine childbearing to a limited number of adults
- Payments to encourage sterilization
- Payments to encourage contraception
- Payments to encourage abortion
- Abortion and sterilization on demand

It's shocking how many of these measures they have managed to achieve in the last 43 years.

Scare tactics and social conditioning have convinced people that there is an “over population problem” and that over population poses the greatest threat to humanity. They've brainwashed the majority into believing that the only way to save humanity is to greatly reduce the world's population.

No matter how often and loud they say it, **Planned Parenthood has never been about “helping women.”** They are about population control and eugenics. That's why their abortion facilities are located in, or close to, minority communities.

At a 1932 Senate hearing, Margaret Sanger spoke of her “Plan for Peace,”

**“The main objectives of the [proposed] Population Congress is to...apply a stern and rigid policy of sterilization and segregation to that grade of population whose progeny is already tainted, or whose inheritance is such that objectionable traits may be transmitted to offspring.”**

Sanger and many of the Planned Parenthood board presidents and members were also members of the American Eugenics Society. More proof of their agenda: Margaret Sanger wrote in a letter to Clarence Gamble, Founder of Pathfinder—one of the most militant, well funded organizations promoting population control throughout the world—about her “Negro Project.”

*We should hire three or four colored ministers, preferably with social-service backgrounds, and with engaging personalities. The most successful educational approach to the Negro is through*

*a religious appeal. The minister's work is also important and also he should be trained, perhaps by the Federation [of Eugenicists] as to our ideals and the goal that we hope to reach. We don't want the word to go out that we want to exterminate the Negro population and the minister is the man who can straighten out that idea if it ever occurs to any of their more rebellious members.*

Dr. LaVerne Tolbert, former Planned Parenthood board member stated in, *A Planned Parenthood Insider Speaks Out*:

*During the course of my five-year tenure, we received a lot of literature discussing population control and concern for the growing number of poor people in the United States and developing*

*countries. As a black woman, I wondered why abortion was more necessary for my ethnic group and why this organization fought so hard to give us this "right" when the rights for better education, better jobs and better housing seemed paramount to me.*

As taxpayers, you and I are forced to support this agenda through the millions of dollars in government grants to Planned Parenthood.

Source of the Jaffe memo: Jaffe, Frederick S. 1969. Activities relevant to the study of population policy for the U.S. Memo to Bernard Berelson, March 11, 1969. In Elliott et al., 1970, and other convergent sources. These proposals were exhibited at the conference in Dhaka in 1969.

## GETTING SCHOOLED BY PLANNED PARENTHOOD

### How they're indoctrinating our youth.

Planned Parenthood (PP) has been actively indoctrinating children since the 1970's. They promote and teach comprehensive sex education in our schools and through various youth groups and organizations. Their website states:

*Sex education that is responsible and medically accurate, begins in kindergarten, and continues in an age-appropriate manner through the 12th grade...*<sup>1</sup>

PP implements sex education programs, provides books, curricula, manuals, pamphlets, research papers, videos, websites, as well as speakers, teachers, and workshops. They train teachers and peer educators for schools and community organizations.<sup>2</sup> Trained peers are there to make sure classmates are informed about access to birth control and abortion.

At Planned Parenthood's on-campus school clinics in Los Angeles and New York, birth control, pregnancy tests, abortion referral, counseling and screening for sexually transmitted diseases are provided without parental involvement, notification or consent.<sup>3</sup> Schools without PP clinics funnel students into PP centers for birth control and abortions through school nurses, social workers and their own clinics.

Parents are routinely barred from PP workshops and conferences for teens. In March of 2010, the Girl Scouts of America hosted a workshop for international youth attending the 54th United Nations Commission on the Status of Women. Adults were banned from the meeting where Planned Parenthood's sex guide, *"Healthy, Happy and Hot,"* was distributed. This disturbing pamphlet contains explicit and graphic details on sex, as well as the promotion of casual sex in many forms. It also encourages HIV-positive teens to have sex and advises them that whether or not

they disclose their infection is up to them. It states that laws requiring HIV-positive people to reveal their status to their partner "violate the rights of people living with HIV" and calls for advocacy to "change laws that violate your rights."<sup>4</sup>

Planned Parenthood most likely has a presence in your local schools and in your community through organizations that serve youth. They may even access kids through churches.

Get informed. Speak out. Protect your children.

**"Every human embryologist in the world knows that the life of the new individual human being begins at fertilization. It is not belief. It is scientific fact."**

*Ward Kischer, Ph.D, Human Embryologist, University of Arizona*

### **Day 1: Fertilization**

The sperm joins with the egg to form one cell. This single cell contains the complex genetic makeup for every detail of a new human being. After fertilization, nothing new is added but oxygen, nutrition and time.<sup>1</sup>

FERTILIZATION

### **1st Month: 1–4 Weeks**

The first cell divides in two, and cell division continues as it travels down the fallopian tube to the uterus. Foundations of the brain, spinal cord, and nervous system are already established and by day 21 the heart begins to beat in a regular fashion.<sup>2</sup> Muscles are forming, and arms, legs, eyes, and ears have begun to show.

4-5 WEEKS

### **2nd Month: 5–8 Weeks**

By six weeks, brain waves can be detected.<sup>3</sup> The jaw forms, including teeth and taste buds.<sup>4</sup> The baby begins to swallow amniotic fluid, and sometimes hiccups.<sup>5</sup> Fingers and toes are developing and at seven weeks the chest and abdomen are fully formed.<sup>6</sup> Swimming in the amniotic fluid, she now looks like a miniature human infant.<sup>7,8</sup>

6 WEEKS

### **3rd Month: 9–12 Weeks**

Unique fingerprints are evident and never change.<sup>9</sup> The baby now sleeps, awakens, and exercises her muscles. The baby is very active. The gender can be visually determined and family resemblances may appear.<sup>10</sup> By the end of the month all the organs and systems of her body are functioning.<sup>11</sup>

10 WEEKS

### **4th Month: 13–16 Weeks**

By the end of the fourth month, the baby is 8–10 inches in length and weighs about one-half pound. Her ears are functioning and she hears her mother's heart-beat, as well as external noises like music.<sup>12</sup> Lifesaving surgery has been performed on babies at this age.

11 WEEKS

### **5th Month: 17–20 Weeks**

If a sound is especially loud, the baby may jump in reaction to it. Thumb-sucking has been observed during the fifth month.<sup>13</sup>

20 WEEKS

### **6th Month: 21–24 Weeks**

Oil and sweat glands are functioning. She grows rapidly in size and strength while her lungs become more developed.<sup>14</sup>

LEGALLY PROTECTED

### **7th Month: 25–28 Weeks**

The baby can now recognize her mother's voice. She exercises by stretching and kicking. She uses the senses of hearing, touch and taste, and she can even look around with open eyes.<sup>15</sup>

### **8th Month: 29–32 Weeks**

The baby swallows a gallon of amniotic fluid per day and often hiccups.<sup>16</sup> The baby's kicks are stronger and mom may be able to feel an elbow or heel against her abdomen.<sup>17</sup>

### **9th Month: 33–36 Weeks**

Gaining one half pound per week, the baby is getting ready for birth. The bones in her head are soft and flexible to more easily mold for the journey down the birth canal.<sup>18</sup> Of the 45 generations of cell divisions before adulthood, 41 have already taken place. Only four more come before adolescence. Ninety percent of a person's development happens in the womb.<sup>19</sup>

## MEDICAL ABORTIONS

### Emergency Contraception - Plan B (The Morning-After Pill)

EC is also known as the morning-after pill. It's a large dose of the common birth control pill and contains synthetic progestogen. EC is designed to be taken as a single dose within 72 hours after "unprotected sex."

**EC works in three ways:** 1. It attempts to stop ovulation. Depending on where a woman is in her cycle, ovulation may or may not have already occurred before EC was taken. 2. It attempts to stop fertilization by impeding the transportation of the sperm to the egg. 3. It tries to stop implantation by altering (thinning) the endometrium (lining of the uterus) so the embryo cannot implant and receive nourishment from the mother.

Contrary to popular arguments, increased access to EC does not decrease the rate of pregnancies and surgical abortions.<sup>1</sup> In England, sexually transmitted infection rates have increased significantly since EC became widely available.<sup>2</sup>

The first two methods are contraceptive, but if they fail, the third method can cause an abortion because it occurs after fertilization.<sup>3</sup>

### ella® - Ulipristal Acetate (UPA)

ella® is a selective progesterone receptor modulator (SPRM). SPRMs block the action of the hormone progesterone, which is necessary for ovulation and implantation to occur. Progesterone also maintains the lining of the uterus and supports the embryo. Currently, the only other legal SPRM drug available in the United States is RU-486 (mifepristone). Although ella® acts similarly to RU-486, it is being billed as an emergency contraceptive.<sup>4</sup> ella® is designed to be taken as a single dose within 5 days of "unprotected sex." It is thought to inhibit and delay ovulation, attempting to prevent fertilization. However, ovulation may or may not have already occurred before ella® was taken. ella® also alters the lining of the uterus, which, **if fertilization occurs, can prevent an embryo from implanting, causing an abortion.**<sup>5,6</sup>

### RU-486 - Mifeprex (The Abortion Pill)

Mifeprex blocks the action of the hormone progesterone which is needed to maintain the lining of the uterus and provides oxygen and nutrients for the baby. **Without it, the baby dies.** Mifeprex is used in conjunction with the drug Cytotec (misoprostol), which is taken two days after Mifeprex, causing uterine bleeding (sometimes profuse), strong contractions and expulsion of the baby.

The pregnant woman first visits the abortionist to obtain the Mifeprex pills, returns two days later to receive misoprostol, and returns a third time to verify that the abortion is complete. The failure rate of this method is about 8% if the pills are taken within the first 7 weeks of pregnancy and up to 23% at 8–9 weeks. If the baby survives the abortion, there is a high risk that they will suffer mental and/or physical birth defects from the misoprostol.<sup>7,8</sup>

## SURGICAL ABORTIONS

### Vacuum Aspiration

During this first trimester procedure, the abortionist inserts a hollow plastic suction tube into the dilated cervix. The uterus is emptied by either a manual syringe or high-powered suction machine. **The baby is torn into pieces as he or she is pulled through the hose.**<sup>1,2,3</sup>

### Dilation and Suction Curettage (D&C)

This is similar to the vacuum aspiration but is generally used after 14 weeks. After the baby is suctioned out of the uterus, the abortionist inserts a curette, a loop-shaped steel knife, into the uterus that is used to **cut the placenta and umbilical cord into pieces and scrape them out into a basin.** The uterus is again suctioned out to ensure that no body parts have been left behind. Bleeding is usually profuse.<sup>4</sup>

### Dilation and Evacuation (D&E)

Once the cervix is dilated considerably farther than in first trimester abortions, the abortionist inserts a narrow forceps that resembles a pliers. This instrument is needed because the baby's bones are calcified, as is the skull. The abortionist inserts the instrument into the uterus, seizes a leg or other part of the body and, with a twisting motion, **tears it from the baby's body. The spine is snapped and the skull crushed. Body parts are then reassembled and counted to make certain that the entire baby has been removed and that no parts remain in the womb.**<sup>5,6,7,8</sup>

### Induction or Prostaglandin Abortion

Labor is induced using prostaglandin drugs, and the cervix is dilated. To ensure the baby will be dead upon delivery and to start uterine contractions, the abortionist may inject saline (salt water) or urea (a substance found naturally in urine and blood). To guarantee against a live birth and legal complications, doctors will inject the drug **Digoxin or potassium chloride directly into the baby's heart to kill the child before delivery.** Other times the baby is delivered alive and left without medical intervention until he or she dies.<sup>9</sup> This method is used in the second or third trimester.<sup>10</sup>

### Dilation and Extraction (D&X)

After the mother undergoes two days of dilation, the abortionist performs an ultrasound to locate the child's legs and feet. The abortionist then uses a large forceps to grasp one of the baby's legs. He pulls firmly, forcing the child into a feet-down position. Using his hands instead of forceps, the abortionist delivers the baby's body in a manner similar to a breech birth. The baby's head remains inside the birth canal. The abortionist uses **surgical scissors to pierce the child's head at the base of the skull.** The scissors are forced open to enlarge the skull opening. The abortionist then inserts a suction catheter into the brain and **vacuums out the child's brain tissue** with a machine 29 times more powerful than a household vacuum.<sup>11</sup>

## BEEN THERE...REGRET THAT.

Women share their Planned Parenthood experiences.

I had a botched abortion in Atlanta's Planned Parenthood abortion clinic. The doctor left the dead fetus inside and I needed immediate medical attention. For the health of women, please defund Planned Parenthood.

*Kayla*

The Planned Parenthood clinic I had my abortion in told me my "fetus" was 7-8 weeks and, being only 15 years old, I didn't know what that meant. Afterward they told me I was actually 10-12 weeks. I got very sick & was vomiting directly after the procedure, the room was spinning and I could barely stand. They pushed me out the door with a plastic bag for my trip home. I had severe pain and hemorrhaging afterward but was too embarrassed to go for help. I suffered with very serious depression & emotional issues for 20 years after.

*Taylor*

I was 17 years old - the lady at the Planned Parenthood clinic in Council Bluffs, Iowa told me I could go to Women's Services clinic in Omaha, Nebraska to get the procedure. My boyfriend at the time was 23 or 24 and I was told not to mention that or he would get into trouble. I don't feel like they really had my best interest in mind. From what I understand, they still give young girls the same advice. I was devastated by that abortion and my life spiraled downward.

*Sarah*

I was 15 years old when my mother and I returned to Planned Parenthood after the contraceptive they provided months earlier failed. I was told I was 11 weeks pregnant and that my pregnancy was a 'clump of cells.' I was told to hurry to make an appointment if I wanted an abortion because at 12 weeks, the price would be higher. I was not given any counseling of any kind whatsoever. Today, I deeply regret my abortion.

# MOST TRUSTED?

We don't think so.

*Jim Sedlak, American Life League*

While Planned Parenthood wants everyone to believe it is the “most trusted” women’s reproductive health organization, both state governments and its own employees know better.

**In recent years, a number of PP’s own employees have filed whistleblower lawsuits claiming PP has defrauded the state and federal governments.**

In 2008, P. Victor Gonzalez, a former financial executive of PP in California, filed a lawsuit against Planned Parenthood affiliates in California. He stated **they overcharged the state and federal governments by at least \$180 million for birth-control pills.** This was despite internal and external warnings that its billing practices were improper.

In 2010, Sue Thayer, former manager for Planned Parenthood of the Heartland (PPH), charged that **PP filed false claims with Medicaid and fraudulently received \$28 million in taxpayer funding.**

In 2011, Karen Reynolds, an employee of Planned Parenthood Gulf Coast, charged in a lawsuit that PP had specifically **instructed its employees to bill the government for services never performed.**

Also in 2011, Abby Johnson, former director of the PP clinic in Bryan, Texas, filed a whistleblower lawsuit charging that her PP affiliate **knowingly sent in about \$6 million in false claims to Medicaid and took steps to cover up its acts.**

**In addition, many states have conducted audits of PP facilities and have documented the same kinds of problems brought up in the lawsuits. A sample of those state audits:**

**California** – A 2004 audit found that **Planned Parenthood of San Diego and Riverside Counties overcharged the government \$5,213,645.92 for oral contraceptives.** Planned Parenthood was supposed to charge the government the cost of the pills. Instead, it charged a much higher price.

**Washington** – A 2009 audit found Planned Parenthood of the Inland Northwest **overcharged the government \$629,142.88.** The audit found Planned Parenthood was charging excessive amounts for contraceptives and distributed and charged for prescription medication without having valid prescriptions.

**New York City** – A 2017 Medicaid audit determined that Planned Parenthood’s Margaret Sanger Center in New York City **was found to have overcharged Medicaid \$27,658.77** which included double billing—billing Medicaid for services provided to patients who were already enrolled in the provider’s HMO network.

In July, 2011, Americans United for Life issued a full report, *The Case for Investigating Planned Parenthood*, that documents these and other problems with PP.

**IT WOULD APPEAR PLANNED PARENTHOOD  
IS IN THE BUSINESS OF MAKING MONEY,  
NOT PROVIDING REAL HEALTH CARE.**

**If only I  
had known**
